

International Society of Regulatory Toxicology and Pharmacology (ISRTP)

Sponsorship Policy

Society General Sponsors

ISRTP does not accept direct commercial sponsors or endorsements for the Society to avoid potential conflicts of interest. ISRTP will not compromise the open public forum for scientific discussion of regulatory issues.

Event Sponsorship Opportunities

ISRTP accepts sponsorships for conferences and workshops and other Society-related events when the proposed sponsor's mission and activities are consistent with the mission and activities of ISRTP. Acceptance of a sponsorship does not suggest ISRTP's endorsement of the sponsoring organization or individual.

Funds generated by the sponsorships will be used for associated conference or workshop expenses. Sponsorships will be accepted from, but not limited to, companies and contract research organizations engaged in the business of chemical, pharmaceutical, food, agricultural, consumer, packaging, and cosmetic products.

Sponsors are not permitted to influence the content of scientific programs or the choice of speakers. Sponsors are not permitted to engage in commercial activity at the conferences and workshops and ISRTP reserves the right to refuse sponsorship proposals. To be transparent, all sponsors will be acknowledged by a statement in the program.
